“Remember. All I offer you is the truth.”

- Morpheus, The Matrix

Preface

My motivation for writing this book was to help consolidate the technical information about the most advanced, secret military weapons being tested on civilians throughout the world, and to give new test victims a literary reference that they can give to police officers, psychiatrists, and family members so that they can be quickly educated on what is happening them. When the person is menticized 1 with drugs and electromagnetics, it is extremely difficult for that person to articulate the complex politics and devious cover up being used on them without sounding crazy. After reading this book, the only excuse people of the community have for continuing to disbelieve the victim is their own ignorance and inability to cope with the shame of being American.

I will sound extreme in my writings. It is the intention of the government experiments to be as violent and harsh as possible to victims to make them sound crazy when they describe the events. I thought about toning it down to be more believable, but it wouldn’t have been the truth. This needs to be part of the historical records for future generations to learn the failings of our own. We should have been more vigilant!

The tactics used by the CIA/DoD (department of defense) for massive human experimentation has not changed in 35 years. Acting like a Dr. Jekyll and Mr. Hyde allows them cover and plausible denial while they cower back into the fringe and shadows of government. If they made the experiments mild, people would be more likely to believe the DoD/CIA conducted this kind of torture research.

Congress is impotent to stop it although they have tried many times in the last couple decades. So as a fact of life, we must cope with the reality of the loss of control of our government and fight to spread the truth through word of mouth and other yet to be controlled information channels. Ignorance is the only enemy and everyone working to keep secrets or spread disinformation are merely the unimportant pawns to be sacrificed in this classic metaphorical battle between good and evil.

I titled this book “The Matrix Deciphered” because I was inspired by the movie series “The Matrix” which was a clear and very accurate metaphor for what is occurring to people. Morpheus says in the movie, “Nobody can tell you what the matrix is, you have to see it for yourself.” You do not want to see The Matrix for yourself. I will do my best in the following pages, to unravel the metaphor and boldly explain exactly what The Matrix is. You will quickly realize how the complexity of the games of power, control,

and disinformation strategies have evolved in the last half century. A certain level of skillfulness and much time is needed for the average person to parse through the vast amounts of material necessary to consolidate it all to a few understandable truths.

The only way we can win this informational civil war, is by educating a certain percentage of the population who will understand the technology and believe the thousands of witnesses. Only then, will government finally stop torturing and killing citizens with these directed energy weapons and apologize for their ‘indiscretions’. Then a new dawn for mankind will come of age that promises to unify the peoples of the world, eliminate pain, and possibly allow us to cheat death. It is the last war that will ever be fought. But the stakes are very high. It is our souls, our freedom of thought and expression, our uniqueness and individuality that will be lost forever if we fail.

The American Delusion - a dream and a nightmare

We are raised on lies and practiced self delusion. We ask, “Do these pants make me look fat?” And we dread the response, “No, it’s the fat that makes you look fat. The pants make you look colored.” We teach others to lie to us. We believe what makes us feel good and rationalize away those facts that don’t. We are in the land of deception. The average person tells 2.5 lies a day. As a social experiment, try counting the number of exaggerations and flat out lies you encounter in a day by people, advertising, and watching the news. Assuming you are worldly and wise enough to disentangle the word games, you will be shocked.

For some, the dream state is pleasant. Sheltered from the misery of the world, given a continuous false stream of hope, and led to believe that they are part of something good, righteous, and moral, many live in an ignorant, myopically focused bliss. For others who adventure too far with truth and knowledge, they will find the roads not traveled to be scary with factual realizations. A mind once stretched, can not regain its original shape. Be forewarned, you can not be put back into The Matrix, i.e. the American delusion.

I used to pose this philosophical question to peers. If there was a virtual reality machine that seemed real in every way and you could determine what your perfect life would be in advance, would you agree to live in it for the remainder of your physical existence assuming your memory could be erased that you chose to do it? Your answer is quite revealing about the base motives that drive your everyday living. If you answer, “No. It isn’t real. My life would be meaningless.” Then you are the type of person who is driven through creating meaning in your life and define your value through your relationships with other people. If you answer, “Yes. Of course. Who wouldn’t want a perfect life?” Then you are a pleasure seeker and define the reason for existence is to optimize your quantitative happiness through your chronological lifespan.

The question is not just a philosophical one anymore. But like in the movie, “Vanilla Sky”, things could go wrong. I always answered the question as such,”I would absolutely do it if I could be assured that the illusion had a 100% chance of success.

Since nothing is 100% certain, I choose not to because the let down would be too great if the program didn’t take.” There is no such thing as the perfect illusion, especially for the critical eye and mind. The American delusion is just such a virtual reality machine, designed of carefully constructed, psychologically sanctioned thoughts with a wireless high tech twist.

You will probably choose to close a blind eye and hope for the best as much of the world has. But you will always ask yourself the same old questions, “Isn’t there something more? What is the meaning?” The question is, of course, ill posed. The

Introduction

question should be, ’’What is meaning?” To answer this question, you must let down your guard, eliminate your ego, and let go of all that owns you for a moment.

The journey to the truth of our existence is an emotionally rocky one. You will find yourself elated at times, and depressed at other times. When you understand, there will be no emotions at all, just acceptance of it.

For this expedition, we will set sail aboard the ship of science. It is a framework of logic and method that has served mankind well since its inception. As your captain on this expedition, I will navigate and guide us while traversing the numerous languages of studies and meld their different vantage points into a single model of reality. The vast sea of human knowledge is separated by barriers of jargon. Once removed, sailing the ocean of understanding is far smoother and direct.

All aboard! Prepare for rough seas! First we head to the land of lies. The psychology of deception we will find. Expect to encounter a known beast that has only one large eye. Fight valiantly and blind the PsychlOps! You must always keep your guard up. Wield your weapons of critical reasoning, skepticism, and logic gallantly and you will defeat the monsters in our journey. Expect the unexpected. We will encounter Medusa in our crossing into the synapse. Be forewarned, this journey is a treacherous one. Hypnotic spells that will turn you to stone chanted by witches unseen, and the sirens of forbidden knowledge will lure us close to our death. But fear not, Apollo the son of Zeus, the god of truth and of light, smiles upon our journey for he too is in confrontation with Mars and Ares, the gods of war.

The truth is not always what you expect to find. During our journey to the land of deception, we must dig deep and follow Alice’s white rabbit down the rabbit hole. Time and space will no longer be flat, and proportions and logic will seem to conflict. The mad hatter is not to be trusted for directions. He is confused on purpose to mislead us in the maze of lies. And if that isn’t enough of an adventure for you, the scarecrow, the tin man, and the lion too cross our paths many times. They were not blessed with a brain, heart, or courage by the wizard behind the current of secrecy. In these failings of creatures, we can triangulate on what we want to be.

There is no turning back, we are in search of the promised land.

Metaphors and analogy are not to be taken literally. They are direction signs in the crossroads to

understanding. Beware of false signs, the little gremlins from the Kremlin and Pentagon, put them up to mislead you. You will in time recognize their signature and be able to distinguish the true path from strategic misdirection.

Follow the radar light, political power, and defense industry greed, and you will find the trolls that are operatives of the American delusion.

We need to cross the Valley of Death, in the beautiful country of California, to see the secret weapons' development that is there. If I were ruler, I would take California and its people away from the hindrances to cultural progress, and set up a separate land with a new bread of enlightened and civilized people. But nay, it can't happen because of an ever gluttonous growing federal giant leech that covets his power and likes to consume his cattle grazing there.

History and Background

EEG Cyber Hive Minds

In order for us to proceed in our understanding of a revolutionizing technology and its capabilities as a weapon, we need to define some concepts and vocabulary.

EEG stands for electroencephalogram. It is a representation of the brain's electrical activity. Traditionally, electroencephalograms are gathered through probes placed all around the head. They measure minute electrical differences from each other that are representative of the brains activity near the probe. A brain map can be inferred from these voltage sensors. EKGs, electrocardiograms work in exactly the same way to measure the electrical waves from the heart. MEG stands for magnetoencephalogram and similarly measure the magnetic fields created from ion flows in the brain. They have different tradeoffs in terms of measuring and locating brain activity. A functional MRI is an active scanning technique used to also measure brain activity in real time as well as its structure. MRI stands for magnetic resonance imaging. It uses magnetic resonance to create photons that are representative of the types of atoms and bonding states they are in. Another sister technology, is called ESR, electron spin resonance. I have not seen any hospitals which make use of this technique by creating images from electron spin resonance. Electromagnetic waves are created by a perturbation to electric or magnetic fields that carry information about the states of angular momentum. There are many more brain imaging technologies but these are the traditional ones.

Using probes to collect brain information has limitations beyond just the lack of mobility from the tethered wires attached to the user. It collects electrical information the best at the surface of the brain but not deep into it, that is why so many probes need to be attached to the head in order to get a more refined picture of activity.

I have been studying the human mind for a good portion of my life, from neuroscience, to cognitive modeling, to artificial intelligence.

Here is secret #1 that has been suppressed by the forces of ignorance in the government. There was

a patent that I will keep referring to throughout this book because of the importance of the work. It is published in the appendix. In 1974, Robert Malech 3 , an

2 “A foolish consistency is the hobgoblin of little minds, adored by little statesmen and philosophers and divines.” - Ralph Waldo Emerson, Essay called “Self-Reliance” 1841.

3 Robert Malech could not be found for an interview. While his patent is profusely referenced, in all fairness the mind control research and technologies began with project PaperClip after WWII. Many Nazi scientists were divided between the Russians and US in order to extract the results of their research performed on the Jews. Electromagnetic control of the brain is thought to be the next WMD(weapon of mass destmction) and

Introduction

employee of Dom & Margolin Inc., a major defense subcontractor in radar design now owned by EDO Corporation an even larger all defense contractor in electronic warfare, invented a fairly simple radar device that could read whole brain electrical activity at a large distance 4 . It has the major advantages of no wires and full brain electrical activity analysis, not just points on the skull surface. He discovered and perfected a way to use some simple electromagnetic oscillations anywhere from lOOMhz to 40 Ghz to read brainwaves by “illuminating” the brain and its electrical conductance then reading the return signal. The imaging method observes the changes of frequency resonances, amplitude, and phase which represent the states of neuron depolarization throughout the brain. 5

Secret #2. But more profoundly, he discovered that he could influence brain waves if precisely timed with a return training signal. He had no idea that at this moment in history, he had accidentally destroyed democracy as we envision it to be. The military and surveillance community immediately picked up on the patent and within two years had reprogrammed their communications and surveillance satellites and terrestrial phased arrays with the new concepts. The rapid deployment of this technology occurred because it only required software changes in already existing radar, imaging, and communications’ terrestrial dishes and satellites. Many additional spy satellites have been launched since to bolster the system. So in 1976, on the bicentennial of this great nation, a system called TAMI was bom. TAMI is an acronym for “Thought Amplifier and Mind Interface”. A more invasive “Big Brother” technology came about before George Orwell’s prediction of 1984.

Secret #3. Stealth RADAR techniques were first recorded by observing the Russian bombardment of the U.S. embassy in Moscow with microwaves. Using high powered steered phased arrays and focused directed energy from two sources next to each other, one can create a nearly undetectable “scalar” wave, or destructive interference at the point of interest. With just a minor energy interaction, the interfering beams bounce back with strong signal to noise ratio to be resolved at the sources again. This allows for any imaging technique to be done from extremely large distances. In effect, it makes distance irrelevant to the detection feature, be it RADAR, MRI, or ESR imaging.

At the same time, the Russians had discovered and were developing similar capabilities. This accelerated the secret arms race that continues to this day.

The research and capabilities have come a long way in the last 30 years. Even if one didn’t have direct access to the knowledge of surveillance capabilities, one could project out in time 30 years knowing technology developments increase at an exponential

has allowed the Nazi mentality to infect the US since. The alien cover-up and live human dissections and torture experiments on random people sprung out of the blackest of operations.

5 There are other ways to wirelessly monitor the body's electricity discussed in later chapters. In fact ion heating and electron gyro frequency reading has been around since the 1960's. It is the preferred method of scalar RADAR bioelectric field reading.

Introduction

rate. At that time the military demonstrated the capability of reading automobile license plates from satellite images.

In order to cover up and not draw attention to mind reading radar, the whole field of psychic phenomena and paranormal psychology was invented to deceive the civilian populations of what was occurring. The Russian's showed their hand when they started bombarding the U.S. embassy in Moscow with microwaves in the late 60' s, and then with the 7 Russian Wood Pecker 6 transmitters that began operation in 1976 pointed at the U.S.

Unfortunately, due to the nature of this new weapon, many human minds are needed to create the database of specific brain data necessary to increase the effectiveness on a larger and larger population. These are referred to as the "Cataloguing and Cloning operations". In this context, cloning does not refer to human cloning, but EEG cloning. Many have misunderstood this fact and then it was popularized by the T.V. series "X- Files". These cloning operations are what plague the human race today as every country feels the need to have this weapon that requires torturing and killing many people of their own populations to develop.

EEG cloning means to copy someone else's brainwaves onto another person. The discovery made by Robert Malech allows this to be done wirelessly anywhere in the world. A new military division emerged called The Psychic Warfare Unit initially stationed in the Pentagon but most likely it was rolled into the Psychological Operations, Electronic Warfare, and Informational Warfare Units. Initially this became a great intelligence gathering tool. Psychically spying into other people's minds was an incredible feat.

I don't use the term EEG cloning much because it refers only to the special case of observing a targets mind. That is only one aspect of the technology. Malech discovered he could influence brain waves just as easily as reading them. So at the other extreme, a psychic warrior can EEG clone his brainwaves onto a target. This is symbolized in the movie "The Matrix" where the agents take over random citizens bodies while in pursuit of the heroes. The correct terminology to describe everything in between the two extremes is EEG heterodyning. Heterodyning is an engineering term which means to mix signals. So EEG cloning is just a special case of EEG heterodyning.

EEG cyber hive mind is another term used for EEG heterodyning for none weapons use experiments. These are collectives of people who share one common set of brain waves. They jokingly refer to the process of forcing someone into a collective as "Borging" them, a reference to the evil cyborg civilization from Star Trek. They are studying both the long term effects of being in this kind of

collective mind configuration and how to use it to control, spy through, disable, or kill a target. They also are studying communication and organization without spy gadgets of any kind for synchronized missions.

The emerging field which intersects at the physics of psychology is called ‘psychophysics’. The dynamics of the mind are well described from neuroscience reductionism. Artificial neural networks have been around for over half a century. But the new challenge is to map exactly the subjective experiences of consciousness to the

physics of organic intelligences’ informational signal processing including biochemical and electromagnetic. The word ‘Psychophysics’ has additional connotations that are quite appropriate in the way that this field has evolved in the secret labs around the world. The tools of psychophysicists are called psychotronics.

It is this area of research that has given rise to all the conspiracy theories on the New World Order psychoterrorists, secret societies involvement, mind control and satanic cults. Mind control weapons are the holy grail of the ultimate weapon and has given birth to the world’s most notorious, sociopathic scientists which in turn have spawned a generation of the most intense human suffering for weapons testing efficacy the people of this planet have ever endured.

The First Documented use of Mind Reading RADAR

In order to reduce the effects from the bombardment of the U.S. embassy in Moscow with microwaves, they put up microwave screens on the windows of the building. Oddly enough, this actually had the opposite effect of increasing the microwave intensity inside. The only way this can happen is if interferometry was being used on the embassy. If you block a path of the interfering / heterodyning wave fronts, you can lessen the destructive interference pattern thereby increasing the measurable energy. This was the first documented use of so called “scalar weapons”.

Two Antenna Example. A phased array of thousands of elements can arbitrarily create one or more beams. The energy can be narrowly focused in constructive or destructive interference mode. This is the basis of directed energy weapons.

In these dark beams, there is almost no measurable electromagnetic energy. However the wave fronts reflect off of surfaces and disentangle the ever so slightly offset angle back at their sources. Stealthy, isn’t it?

The dark striations are destructive wave fronts. The bright ones are constructive interference. These beams can be steered by phase shifting the other antenna signals.

Lured by the Sirens of Truth

“True nobility is exempt from fear.”

- King Henry the Sixth, Part II (Act IV, Scene I).

My Story

Some people will feel that it is an appropriate irony that the world wide surveillance and obviously integrated psychotronic directed energy systems should be used on me since, I ignorantly participated in building cogs for the subsystems of the machine, like the Jews who dug their own graves in the Nazi Holocaust. But I assure you that I am not alone. Indeed, most scientists and engineers working on DoD projects have no idea how the pieces ultimately fit together and how the system as a whole will be misused.

Welcome to HELL 7

Two people on different days walked by me and said, “You are going to have a psychotic break. You are a psychopath.” The first time it happened I assumed the person was talking on a cell phone and I didn't see the headset.

I was happy, relaxed, and doing what I love to do, invent, socialize, write, and learn. Life was good.

On October 31, 2004, Halloween, the spooks came out. I felt a little strange after waking up from a nap and feeling groggy which didn't go away for the entire day. The synthetic telepathy began. As clear as a cell phone call, I was talking aloud and one main speaker with three other people on the other end of the conversation would reply. Rather than being frightened, I thought someone like my neighbors were pranking me using a technology called ultrasonic heterodyning not very well known in the United States except as a weapon made by American Technology Corporation, but used in vending machines in Japan. They had a program l ik e “Candid Camera”, that used this technology to make people think they were crazy and used it for other gags. It projects sound so that only one person can hear it at large distances. It was very fascinating for me to get a demonstration of the technology I thought. It was Halloween and they introduced themselves as a 'Satanic Ritual Abuse Cult'. I wasn't really very familiar with cults but I assume that could be scary. When I didn't seem to react to that cover story, they went on to try several others. “We are the Borg and we are assimilating your uniqueness,” a man proclaimed in a confident voice. “Whatever,” was my rebellious disinterested reply, even though I was actually quite interested in the technology demonstration. “I am God.

{pause}. Would you believe I am the Angel of Death ?” The conversation continued. “No. OK. We are evil aliens and this is an alien abduction,” they less assuredly claimed. I thought to myself without

speaking, “Wow, they really should have rehearsed this prank before trying it on me.” “Hmmm. How about this. We are brain nappers? You are food for thought.” The conversation became more belligerent and repetitive. The only relief I got was putting mineral oil in my ears and plugging them with wax. However, it continued for 9 full days and that's when the torture began.

Imagine every pain you have ever felt and many you haven't being repeatedly played into your mind like MP3 files for twelve seemingly unending months. All the time, the narrators describe in detail what kind of pain you are feeling and psychologically abusing and tormenting you the best they can.

After being run through the battery of torture tests, I can confirm that what one of the researchers involved with mind control brags about in his paper is true. “I can control every aspect of human mental function at 450MHz.” These tortures and experiments easily stole 35 years of my life or more. Colonels involved with the EEG heterodyning weapon claim they have demonstrated its lethality many times. I have since identified many people they have killed in this way.

I developed quite a rapport with the mind control weapons testers. Our conversations became more half hearted and honest.

Agents asked,”Can you get close to the president? Would you kill him for us? We just have to get you to say that aloud to people to make them think you are insane and dangerous. We usually can get people locked up in an insane wing at a hospital by the first month or commit a crime through their bodies. We need you to discredit yourself.

Do you have any ideas?“

My reply: “I don't think you need to do anything. The technology is too unbelievable for most to comprehend and your brutality on so many citizens will be enough for the majority of people to be skeptical and tune out.”

Agents: “Can't you just tell people that the Russians, Chinese or the FBI is behind

it? ”

I reply, “What else do you have to choose from?”

Agents: “Those are the only scripts we've been trained on. We are big powerful psychic warriors and you should fear us and do what we say. If you kill your father we will let you go. You've got to commit some crime to discredit your testimony. We need blackmail, something. Nobody is as perfect as you. Who are you, fuckin' Jesus?”

I prophetically declare,” No, I'm not even religious, but if I can perform three miracles: expose your long history of crimes against humanity, find defenses against the weapon, and help usher in a new scientific era, I would be a Saint.“

Preamble

I have great pride in the fundamental and constitutional values of America and mean no disrespect by my blasting the incompetence, apathy, and stupidity of those involved in the conspiracy of involuntary biological, chemical, and psychotronic human effects testing. There are so many brave men and women serving in the armed forces who fight and protect us for the American values they believe in. But because of the silos of information called compartmentalization in the security agencies and the lack of accountability and oversight of black operations and some top secret projects, diabolical elements become rogue or worse destroying the very country they are tasked with protecting turning it into a hypocrisy rather than a democracy.

My goal is to awaken Americans to the continued horrific acts of military and CIA weapons testers in this country and the other branches of government’s inability to stop them and hold them accountable.

All I ask from the reader is to listen to testimony and validate facts presented here and come to their own conclusion. Then fight to win back America from this silent overthrow. This has been my project for about two years, investigating government corruption, incompetence, and cover-up upon which I accidentally stumbled one day while looking at a reverse MRI scheme to inject electromagnetic signals into the brain for virtual reality applications. I have interviewed over two hundred people and worked on the highest level of military projects for the U.S., NATO, and U.K. and have given videotaped testimony to senators and representatives on this topic resulting in lip service since they have no real power to enforce. Two high level FBI agents and a couple CIA agents have come forward to validate the existence of a MKULTRA like project that continues to grab random people for mind control experimentation. Two of these have since become part of the program and endure daily psychotronic tortures. All the torture can be done using directed energy psychotronic weapons.

I apologize to the human race for any contribution to these next generation weapons that I may have worked on that are more horrific than the nuclear bomb and whose cover-up is more pervasive than the Manhattan Project. And because of the horrific acts of violence being committed on as many as one thousand Americans as far as my research has uncovered and many others in other countries, I understand the extreme risk to my own welfare that publishing this material will have. But freedom is so important to me that I know full heartedly that the human race must have an open discussion on these weapons to decide their own fate before the point of decision is gone, that I am willing to risk divulging so called national secrets. All I offer you is the truth.

All information presented in this book was received through legitimate channels such as the Freedom of Information Act, military documents, victim testimony, and turned agents. I still hold valid the oath I took to keep secret the details of the projects that I worked on under DoD budgets. The majority of the proceeds of this book will go towards helping the psychotronic experiment survivors and surviving families of those that have perished. When the government fails, business and the citizens must look out for each other.

I want to make this absolutely clear. This book is nonfiction, a two year investigative report uncovering the United States mind control human experimentation and torture programs. I know the views that I express in these pages will not be popular given the current patriot fervor. But please remember that I am only the messenger. I am sorry I must be the bearer of bad news.
