

3.EUROPA - TARGETED INDIVIDUALS

The human mind has never been a simple project. Because of its complexity and plasticity, it has yet not been completely understood. Under the dark ages of brain research, scientists have nevertheless learned how to stimulate and partially control the human brain's responses. At any time it has been done, it has caused pain and suffering for the owner of the brain: the human subject. Backed up by the "best" scientists, sponsored by the military and the secret service, thousands of individuals have their lives destroyed in the quest of developing technologies that are not science fiction anymore. The human brain, is seen as a computer where information can be downloaded and from where information can be uploaded. Cloning the individual's brain and nervous system is the only hope today's scientists have to understand the human brain and develop advanced artificial intelligence and synthetic telepathy, allowing people to communication by thought, not speech. The European and World countries governments, faced with this "challenge" are unable to protect their citizens against the greatest possible violations of their human rights. There are no excuses whatsoever for researchers to destroy people's and entire families lives. Under the secrecy of "national security", they violate human rights conventions and every universal human right a human being is born with, going deep into the very consciousness of the person that is affected. 10 Many human rights campaigners from around the world have spent years working on countless books, videos, websites, rallies and symposiums which highlight these matters. These include efforts by prominent persons like Dr Nick Begich, Dr Rauni Kilde (ex chief medical officer for Finland) and well known author Gloria Naylor. To date, all of it has been ignored by the criminally owned/controlled media. However, most importantly, there has been open condemnation of these methods by major political entities and I ask you to focus on these... 1. The United Nations - UNIDIR - (The UN Institute for Disarmament Research) officially recognised a range of weapons (both lethal and non-lethal), including the ones previously listed, and recommended that they ALL be banned as weapons of potential mass destruction. Naturally, the press releases and media guides that they issued on this matter were totally ignored by the mainstream media. This media treachery is the reason the public is unaware of the dangers. 2. The European Parliament - In January 1999, the European Parliament passed a resolution where it calls " for an international convention introducing a global ban on all development and deployment of weapons which might enable any form of manipulation of human beings. It is our conviction that this ban can not be implemented without the global pressure of the informed general public on the governments. Our major objective is to get across to the general public the real threat which these weapons represent for human rights and democracy and to apply pressure on the governments and parliaments around the world to enact legislature which would prohibit the use of these devices to both government and private organisations as well as individuals." (Plenary Sessions/ EuroParliament, 1999) 3. US Federal politician Dennis Kucinich - In October 2001, Congressman Dennis J. Kucinich introduced a bill to the House of Representatives which, it was hoped would be extremely important in the fight to expose and stop psycho-electronic mind control experimentation on involuntary, non-consensual citizens. The Bill was referred to the Committee on Science, and in addition to the Committee on Armed Services and International Relations. In the original bill a ban was sought on 'exotic weapons' including electronic, psychotronic or information weapons, chemtrails, particle beams, plasmas, electromagnetic radiation, extremely low frequency (ELF) or ultra low frequency (ULF) energy radiation, or mind control technologies. Despite the inclusion of a prohibition of the basing of weapons in space, and the use of weapons to destroy objects or damage objects in space, there is no mention in the revised bill of any of the aforementioned mind-invasive weaponry, nor of the use of satellite or radar or other energy based technology for deploying or developing technology designed for deployment against the minds of human beings. [the original Bill was called The Space Preservation Act, 2001 (HR 2977) it was reintroduced as The Space Preservation Act, 2002 (HR 3616)]. Kucinich's efforts mirrored similar attempts made some years earlier by ex astronaut, Sen. John

Glenn. 4. US Federal politician Jim Guest - recently wrote to all members of the US legislature asking for help for the countless victims of electronic harassment/torture (agency black operations being secreted from congressional scrutiny thus allowing corrupt officers to frame/torture innocents). To date, nothing concrete has come of this approach. 5. French National Bioethics Committee - In January 1998, an annual public meeting of the French National Bioethics Committee was held in Paris. Its chairman, Jean-Pierre Changeux, a neuroscientist at the Institut Pasteur in Paris, told the meeting that "advances in cerebral imaging make the scope for invasion of privacy immense. Although the equipment needed is still highly specialized, it will become commonplace and capable of being used at a distance. That will open the way for abuses such as invasion of personal liberty, control of behaviour and brainwashing. These are far from being science-fiction concerns and constitute "a serious risk to society." ("Nature." Vol 391, 1998) 11
